Biology: Human (BIOH)

Courses

BIOH 094 PCE Non-Credit BIOH Class
CEUs: 6
Term: (Based on sufficient demand)
Non-credit professional and continuing education (PCE) courses offered to provide condensed coursework to meet the needs of working students and professionals. These courses are eligible for Continuing Education Units (CEUs) and are transcribed on the student's continuing education transcript.

BIOH 104 Basic Human Biology w/ Lab
Credits: 4 (3 Lecture, 1 Lab)
Term: (F, S)
Prerequisite: M 065 or higher, and co-enrollment in the WRIT 101 corequisite or WRIT 101, or qualifying placement score within the past 3 years
Core Class: Natural Science
This course introduces students to the structure and function of the human body. Topics such as the fundamental principles in organic and inorganic chemistry, cellular metabolism, cellular anatomy, cellular biology and histology will be covered and subsequently applied to the physiology of the body as whole. Organ systems to be covered in this course include cardiovascular, lymphatic, respiratory, nervous, musculoskeletal, endocrine, urinary, digestive, and immune.

BIOH 108 Basic Anatomy
Credits: 4
Term: (F, S, Su based on sufficient demand)
Prerequisite: M 065 or higher, and co-enrollment in the WRIT 101 corequisite or WRIT 101, or qualifying placement score within the past 3 years
Core Class: Natural Science
This course provides an introduction to human anatomy and basic physiology. Included are fundamental overviews of: biology, chemistry processes as they pertain to the human body. This course serves as a primer for students who are seeking to develop a foundational understanding of the objectives, prior to enrolling in Anatomy and Physiology I & II (i.e. BIOH 201 and BIOH 211).

BIOH 112 Human Form and Function I
Credits: 4 (Lecture only, no Lab)
Term: (F, S, Su)
Core Class: Natural Science
This course is the first in an online, two-course sequence for non-clinical health majors that provides a comprehensive study of the anatomy and physiology of the human body. The course will take a systemic approach covering all body systems. Topics will include structure, function, and interrelationships of organ systems. The course will provide a foundation for students entering non-clinical health careers.

BIOH 113 Human Form and Function II
Credits: 3 (Lecture only, no Lab)
Term: (F)
Prerequisite: BIOH 104 or BIOH 112
This course is the second in a two-course sequence for non-clinical health majors. The course will build on the topics explored in the first semester. Body systems will be covered in greater depth, and the focus will be on the interrelationships between systems. In addition to structure and function, an emphasis will be placed on the body processes that maintain homeostasis. The course will take a problem-based approach, allowing students to use critical thinking skills and apply knowledge from both semesters.
